ENGINEERING

Department

Engineering is the practical application of science and problem-solving skills to build physical goods, processes, or services. From bridges to bicycles to Bluetooth headsets, many aspects of daily life are the result of engineering.

Occupations

Engineers of all specialties are in high demand across a broad spectrum of industries, with double-digit job growth forecast in most disciplines. Engineering skills provide a solid foundation for a range of STEM careers and STEM-adjacent fields such as teaching, science writing, technical sales, and patent law.

- Engineering lab technicians
- Chemical engineers
- Computer engineers
- Mechanical engineers
- Robotics Technicians
