

CHEMISTRY

Department

Chemistry is the study of matter – its composition, properties, and potential transformations. Drawing from physics and mathematics, chemistry is considered “the central science” and is the foundation for life sciences, engineering, and medicine.

Occupations

A chemistry degree is the starting point for career paths ranging from medical professions to analytical lab work in a variety of industries from water quality to winemaking.

- Quality control analysts
- Forensic Toxicologists
- Chemists
- Chemical engineers
- Food scientists and technologists
- Chemical technicians
- Medical and clinical laboratory technologists
