DIGITAL DESIGN GRAPHICS TECHNOLOGY

Department

Help transform ideas into reality – physical or virtual – by combining artistic inspiration and 21st-century innovation. Digital Design and Graphics Technology students learn to create schematics, plans, models, animation, and digital designs to communicate intentions and translate abstract concepts into guidelines for physical reality. Graduates develop cutting-edge technical skills that are in high demand in today's digital-first world.

Occupations

DDGT is proud of its record in vocational placement of our graduates, who go on to job roles in the fields of architecture, engineering, multimedia, and many other digital graphic technology professions. Students have enough of a skill-set to work as an entry level drafter after the first semester. Many DDGT students have used the training received at NVC to launch four-year programs of study in related fields.

- Architectural drafters
- Mechanical drafters
- CAD technicians and drafter
- Multimedia graphic designers
- Animators and 3D modelers
