

GEOGRAPHY

Department

Geography helps us understand the meaning of a place. Forming a unique bridge between the social and natural sciences, geography includes study of cultures, political systems, economies, landscapes and environments.

Occupations

Geographers use many tools and techniques in their work, and geographic technologies are increasingly important for understanding our complex world. In addition to jobs related to mapping and surveying, Geography graduates can work as environmental conservationists, policy analysts, planners, and geospatial technologists.

- Surveyors and mapping technicians
- Environmental conservationists
- Public planners
- Emergency response coordinators
- Logistics and supply chain managers
